FOB 125° Ogee Box Angle Joiner

1. Introducing the 125° Ogee Box Angle Joiner from Freefoam

2. Common problem associated with imperfect cuts resulting in gaps

3. Common solution: Mastic applied to fill unsightly gaps

4. The Freefoam solution: Fast, simple, and tolerant of human error

1. The 125° Ogee Box Angle Joiner from Freefoam is the latest in a line of innovative solutions for the roofline installer. The product can be utilised to conceal unwanted gaps and imperfect joins on the gable box.

2. Shows a common fault associated with the joinings. The two boards are cut, but often due to human error, the end cuts do not match up, meaning that there are unsightly gaps.

3. Shows the typical repair work that is commonly used to seal any unwanted gaps with mastic.

4. Freefoam's innovative Joiner solution allows for inaccuracies, gives a perfect finish and the time saved more than pays for the part.
