## GPBDV (General Purpose Board / Double Vented)

Introducing the "GPBDV" double vented rigid soffit board from Freefoam

The GPBDV completes the range of rigid soffit boards, GPB and GPBV

Twice the amount of Slots as the GPB, this means superior Ventilation

Use Plastops range of fixings to secure GPBDV to the roofline

Introducing the newest product from the Freefoam Soffit board collection. The GPBDV, which stands for General Purpose Board Double Vented, offers the advantage of Rigid PVCUE 10mm board with twice the ventilation capacity as their pre-existing single vented board GPBV.

This solution is designed to alleviate the necessity for add-on components such as the F109. Paudie Leahy, engineering manager insists, "by using the GPBDV, you can be assured of a top-quality product

with superb ventilation capabilities and therefore far less fixtures." The GPBDV is only one in a line up of new products being introduced into the Freefoam Range in recent Months. "There is a constant

development of new products here in the company, as we are always looking for better quality products that serve our end-users best", comments Tony Walsh, managing director.
