The Building Research Establishment's (BRE) 'Green Guide To Specification' has given PVC cladding an A+ Rating when installed with standard components.

Fortex® Weatherboard Cladding

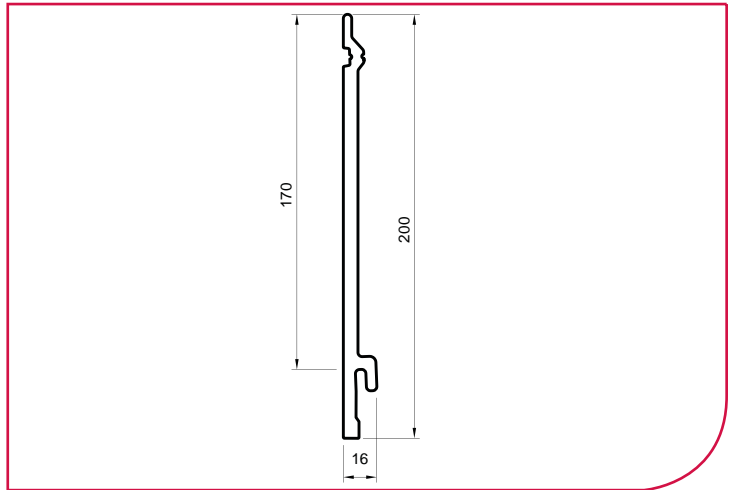

1. Weatherboard cladding board.

2. Installation suggestion for Weatherboard cladding.

3. Installation of Weatherboard cladding.

4. Product profile and leading dimensions

Freefoam has introduced a new product to its range of Fortex® textured wood effect cladding systems. The new Weatherboard cladding product has a flat appearance when installed, has the same attractive textured wood effect as the other products in the Fortex range and comes in a range of 6 beautiful colours including white, pale gold, colonial blue, storm grey, argyl brown and sand.

The new product gives customers and homeowners additional choice when it comes to selecting a style and colour that suits their home or project. The quality, quick installation and low maintenance features of the product are major benefits for the owners of residential and mobile homes. The Weatherboard cladding system includes a range of matching accessories to ensure a neat and professional installation.
